

All Things Costa Rica

A pathfinder for young adults who are planning a trip to Costa Rica.

About This Pathfinder

Costa Rica is a small country located in Central America. It is becoming known for eco-friendly tourism as well as its great nature diversity. Costa Rica is a wonderful destination for high school Spanish Clubs and/or Spanish classes. It offers students a chance to use their Spanish skills while learning about a Spanish culture in a unique location much different than the United States.

This pathfinder is designed primarily for high school students or young adults taking a trip to Costa Rica. It would also be useful for people who just want to learn more about the country. The pathfinder will help students learn about the different aspects of Costa Rica including culture, climate, people, land, wildlife, traveling information, and tourist destinations. In other words, you will find out about all things Costa Rica. Use this pathfinder's sources to plan, prepare for, and take with you on your trip to Costa Rica. After using some of the resources on the pathfinder, be sure to check out Extension Ideas for activities.

Electronic materials are useful when learning about another country because you get up-to-date information. Print materials can quickly become outdated. Websites that are kept updated allow you to know when a new road is built, a tour guide operation is no longer open, or know about the current weather forecast or exchange rate. This pathfinder gives you access to current information quickly.

When choosing the sources for this pathfinder, I kept the following questions in mind. Does the source enhance the user's understanding of Costa Rica? Will the information assist the user in planning and/or taking a trip to Costa Rica? Is the source interesting and easy to use?

Databases, Reference Resources, & Searching Ideas

Academic Kids Encyclopedia, last modified May 9, 2008

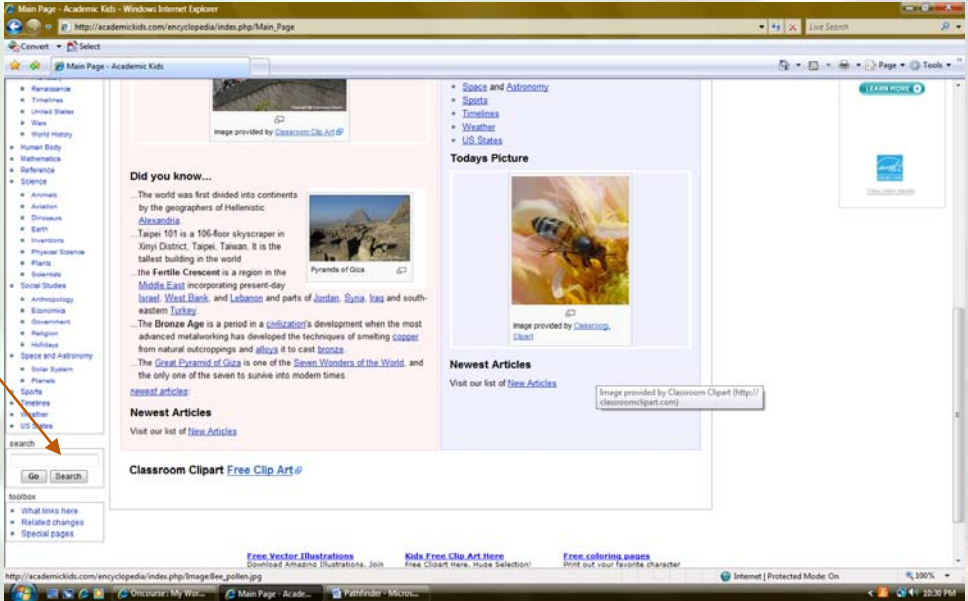

http://academickids.com/encyclopedia/index.php/Main_Page

- Academic Kids is a free online encyclopedia for students. It is easy to use. To find information you can either select a category from the Subject Categories list or type in your search on the search bar.

Click on "Countries of the World" for a list of countries. Then choose Costa Rica from the list.

Click in the Search box and type in your search. Try typing in Costa Rica then click on "Go."

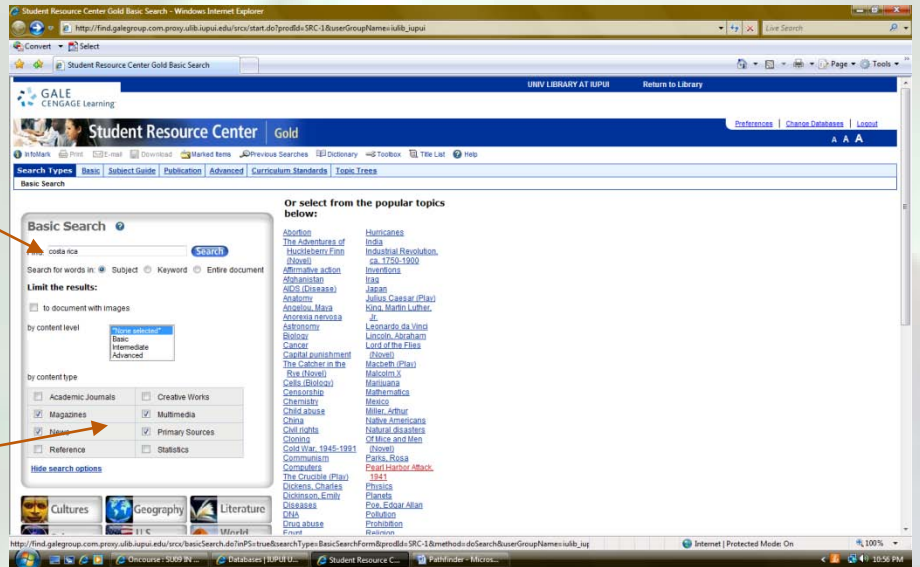

Student Resource Center, Gold (Gale CENGAGE Learning), last updated May 26, 2009 http://find.galegroup.com.proxy.ulib.iupui.edu/srcx/start.do?prodId=SRC-1&userGroupName=iulib_iupui (A password is necessary to access the database from this link. Check your local library for access to this database or ask your librarian about a similar one.)

- This database features information from a variety of sources including academic journals, magazines, news, reference, statistics, primary sources, and multimedia. To use the database type in your search keywords into the search bar and click on the "Search" button. You may choose to limit your search by content level (basic, intermediate, or advanced) and/or choosing only the source types you

want information from such as magazines and multimedia. The screenshots below are of a sample search using the very general search term "Costa Rica."

Type in the search term Costa Rica

Choose your search limits. I chose intermediate level and magazines, news, and multimedia.

I found many articles about Costa Rica. Click on the different tabs at the top of the results to see results from different media (ex. magazines, multimedia, etc.).

To read the article online, select the resources that say Full-Text. Simply click on the article you want and read the information.

You can find many articles about Costa Rica. Typing in "Costa Rica" is a very broad and general search term. It yields many results. Another way to limit search results is by typing in more specific searches. For example, maybe you want to read more information about Monteverde Cloud Forest, so type that into the search bar. Try using some of the following keyword searches in this database or other online search

tools such as <http://www.google.com>. Costa Rica and tours, Costa Rica and rainforests, Costa Rica and animals, Costa Rica and travel tips. When you think of other search terms write them down, so you will remember to try them.

Useful Software and Internet Tools

Learn Spanish Software, Rocket Spanish,

<http://www.rocketlanguages.com/spanish/premium/index.php?hop=polygonzo>

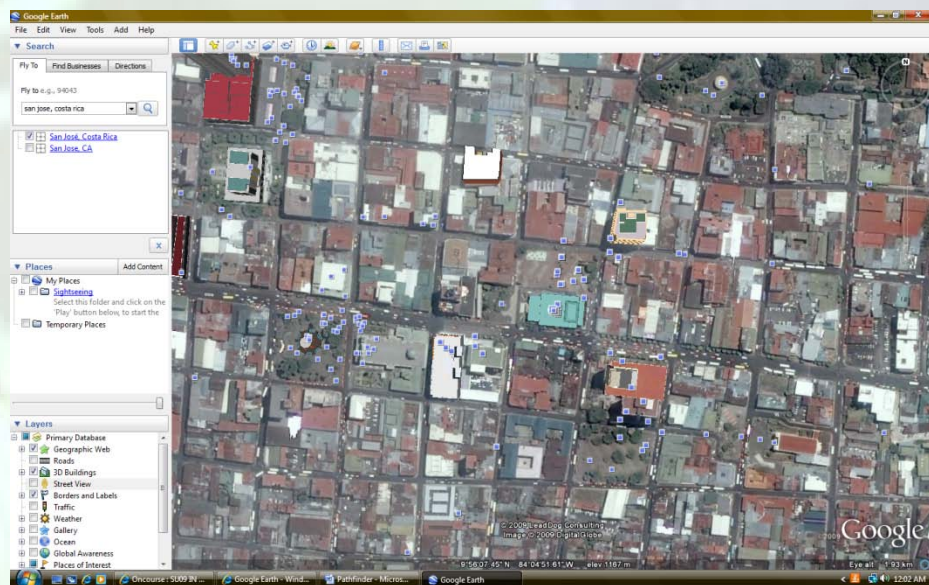

- Spanish is the official language of Costa Rica and knowing some Spanish will help you get around easier throughout your travels. This software will help you better your conversational Spanish skills. The

following is part of a review from <http://www.learningspanishprograms.com/rocket-spanish-review.html> : "Unlike other learn Spanish software titles, Rocket Spanish is more of an audio course. Its main goal is in teaching you useful phrases and words for conversational Spanish. If you're looking for a program that gets into writing, and spelling then this isn't the Spanish program for you."

Google Earth, ©2009 <http://earth.google.com/index.html>

-Use Google Earth to look at different cities around Costa Rica. Since you have to download the software to your computer (there is a free version), be sure to ask permission to download. Your local library may already have the software available on their public use computers. Use Google Earth to look at different cities and destinations around Costa Rica. Type in the city you want to see in the "Fly to" search bar. Use the scrolling feature on your computer mouse to zoom in and out.

The bigger cities are more likely to have clear pictures up close. The screen shot below is of San Jose, the capital of Costa Rica. I typed in San Jose, Costa Rica into the "Fly to" bar.

Exchange Rate Converter, Yahoo.com, ©2009

<http://finance.yahoo.com/currency-converter?u#from=USD;to=CRC;amt=1>

- You will need to know how many U.S. dollars equal a Costa Rican colon so you know how much things cost. Type in United States Dollar and Costa Rica Colon into the converter boxes and the amount of money you want to exchange. I find it most helpful to choose 1 dollar as the United States dollar amount. You will then find out the current exchange rate.

Weather, The Weather Channel Interactive, Inc., ©1995-2009

<http://www.weather.com>

- Use weather.com to find out what the weather is in different Costa Rican cities. Simply type in the city name into the search bar and click the "search" button. You may have to type in Costa Rica after the city name or choose the right city from a list. For example, type in "San Jose, Costa Rica" instead of just San Jose. Click the following links for the cities I looked up for you or type in your own search.

San Jose:

http://www.weather.com/outlook/travel/businesstraveler/local/CSXX0009?lswe=san%20jose,%20costa%20rica&from=searchbox_localwx

Puerto Limon:

Extension/Activity Ideas

1. **Be a Chef** - Choose some Costa Rican recipes to make from the recipes found in the Food section websites. Split into groups and have each group make a different recipe. Host a Costa Rican cuisine night and sample the different foods. Food could also be brought into a Spanish class classroom. Vote on which recipe is your favorite. Be sure to try and order your favorite food while in Costa Rica.
2. **Plan the Trip** - Using the websites in the General Information area find activities and/or tours that you would like to do. Create a travel itinerary with the places you want to see on it. Be sure to include the day you will be there, specific city names, what you want to do there, and tour group operation (if applicable) you would use, where you will spend the night, and how much it will cost. You should also include phone numbers and address of these locations when possible.
3. **Travel Brochure** - Create a travel brochure that sparks interest in Costa Rica. Use your knowledge built from any or all of the sources in this pathfinder. Your brochure should be attractive and include interesting and useful information about Costa Rica. Remember, you are trying to persuade people to want to go to Costa Rica. Pass the brochure out to fellow classmates or club members who are still unsure about going on the trip. Or, plan to make a brochure about Costa Rica before the first informational call out meeting about a trip is planned. Then with the teacher or adult sponsors' approval, you can pass them out to the people at the meeting.
4. **Weather Forecaster** - Use <http://www.weather.com> or <http://www.worldweather.org> to compare Costa Rica's weather with your local weather. First, type in the name of your city to find out what the weather is your area. Then, select or type in different Costa Rican cities to find out about their weather. Besides knowing the current weather, it would be useful to see what the

weather typically is for the Costa Rican city during the particular month of your trip. Look up typical weather for both your city and the Costa Rican city. Chart the comparisons and contrasts on Venn diagram. You will know what weather to expect and thus what clothing to pack and wear. See below for an example of how to set up a Venn diagram.

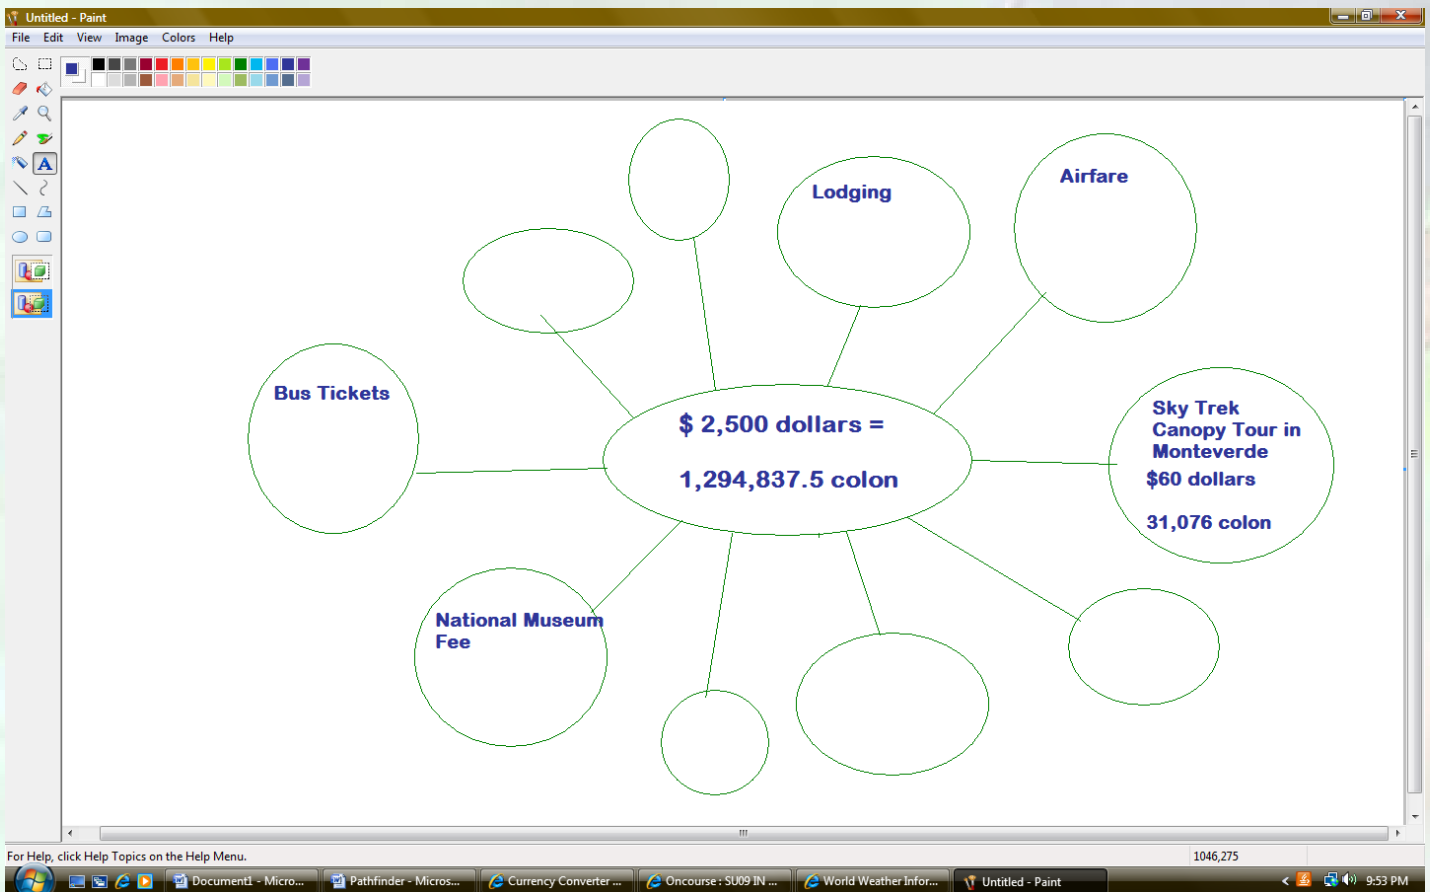

5. **Presentation** - Together with your intended travel group (classmates, club members, etc.), pick a topic about Costa Rica and become an "expert" on it. Each person should pick a different topic. Some topic suggestions are Costa Rican culture, food, popular destinations, rainforests, and economy. Use the sources on this pathfinder to learn all about your topic. Remember the databases could help you find many articles about your topic. Create a presentation about your information. You might want to use a program such as Microsoft PowerPoint to make visuals for your presentation. Share your "expertise" with your travel group.

6. **Create a Game** - Design a game that incorporates Costa Rican themes and Spanish words. It might be a board game with Costa Rican landmarks. For example, you roll a dice and move ahead four spaces and land on the Poas Volcano. It may say something like "stuck in the lava lose one turn." Perhaps you land on a space that is a zipline rainforest canopy tour and skip ahead three spaces. Try to use Spanish words or phrases that might be helpful when traveling to Costa Rica. Maybe you land

on the La Tienda (store) space. Another person playing the game draws a card with an object for sale on it and reads you the card. Make the items for sale something you are likely to buy in Costa Rica. For instance, the person reading the card might read: *Cuanto es el café?* (How much is the coffee?). You would answer by guessing a number one through six and rolling the dice. When guessing the price, answer in Spanish. For example, *el café es cinco colons* (The coffee is five colons). If your guess matches the dice you move that many spaces ahead. If your guess is wrong, you move backwards the number shown on the dice. Try to incorporate as much Costa Rican themes as possible.

7. Make a Budget - Use the pathfinder sources to find out about different places and activities you want to see and do. Find out how much each activity will cost and use the currency converter to find out how many U.S. Dollars and Costa Rican Colons each thing will cost. Be sure to list both the dollar and colon amount for each item. If you made an itinerary, use the places you selected on it. Organize your information by creating a graphic organizer like the one below. Start by placing your budget amount in the center circle. The example below already includes some circles filled out. Fill in your circles with any expense you want to include. When you are finished filling in your circles add up your estimated money spent. Did you go over budget? This activity will help you estimate how much money you will need for your trip.

For Teachers

8. Curriculum Standards - Using this pathfinder and/or can help meet curriculum standards in your school. The following are just some of the standards that could be fulfilled when utilizing this resource. These standards were retrieved from the Indiana Department of Education website in May 2009.

<http://dc.doe.in.gov/Standards/AcademicStandards/StandardSearch.aspx>

Hospitality, Travel, and Tourism - HTT.20.1 Students develop an understanding of basic physical geography and major tourist areas of the world.

World Geography - WG.2 Students will acquire a framework for thinking geographically about places and regions. They will identify the physical and human characteristics of places and regions. They will understand that people create regions to interpret Earth's complexity, and how culture and experience influence people's perception of places and regions.

Geography & History of the World GHW.11 Students will examine the physical and human geographic factors associated with sports, recreation and tourism along with the local and global consequences of these activities.

Pura Vida!

"Literally 'pure life,' a national expression that sums up the desire to live the best and most pure existence."
(*The Travel Book a Journey Through Every Country in the World*, Lonely Planet, 2005, p. 97.)
