

Blogs & Blogging:

A Homerun for Teaching, Learning, and Technology

Annette Lamb alamb@eduscapes.com <http://escrapbooking.com/blogging/>

Blog Basics <http://escrapbooking.com/blogging/basics.htm>

Journaling for Today's Interactive Kids and Teens

Bloggng: Everyone, Educators, Schools & Classrooms, Collaboration, Personal Inquiry

Blog Characteristics

Web-based journal, log, diary	Single author
Short entries or postings	Links to documents, websites, additional information
Opportunity for commenting on entries	Hierarchical structure; reverse chronological organization
Generally public (password optional)	Sometimes contain graphics, audio, or video
Entries are archived and categorized	Entries have permalinks
RSS, aggregation, and permalinks allow quick and easy access	

Blog Popularity

- ❖ Free or low cost with upgrades; Easy entry, unlimited high-end options with upgrades
- ❖ Ease to set-up and create using templates; No special software or skilled required
- ❖ Available anywhere, anytime ; Simple to post new entries or make comments
- ❖ Automatic archiving; No technology maintenance or issues
- ❖ Teachers and Blog Popularity; Easy for teacher to provide written feedback
- ❖ Much easier for students and teachers to maintain than web pages
- ❖ Time stamps show when students made entries; Multiple blogs for many purposes
- ❖ Students have ownership and access beyond the school setting
- ❖ Student enjoy the writing experience
- ❖ Students don't get lost in the "glitz" of the technology
- ❖ Teachers can add password protection and membership restrictions as needed
- ❖ Communication with the community and parents is essential, blogs are the tool
- ❖ Extends learning beyond the period or school day (i.e., e-speakers, questions and answers)

Blog Missions - <http://escrapbooking.com/blogging/missions.htm>

- ❖ Explore Options - About This Site, FAQs, Contact Information
- ❖ Ask yourself: What's the motivation of the author?
 - Who reads the blog?
 - How did the author envision the blog being used?
 - How credible is the info found?
 - What questions should I be asking as I explore the blog?

Bloggers As... - <http://escrapbooking.com/blogging/bloggers.htm>

Diarists	Enthusiasts	Institutional Outreach
Journalists and News Reporters	News Pundits	Advocates and Columnists
Stars	Promoters	Specialists

Blog Organization - <http://escrapbooking.com/blogging/organization.htm>

Blogs in Teaching & Learning <http://escrapbooking.com/blogging/tl.htm>

Activate. Motivate with blogs. Use a blog as a catalyst to generate interest in a new topic. Help students see the excitement and energy that can be found in a subject. For example, show the enthusiasm of mathematicans.

Connect. Provide a context or establish a connection. Bring relevance to the discussion by using a "real world" situation or example found in a blog.

Critique. Critically evaluate an idea or perspective by using examples to support a position. Many of these examples can be found in professional blogs.

Deepen. Add depth to a learning situation by providing a detailed explanation, thoughtful observation, or new resource that provides additional information or insights. For example, use a law blog to learn more about law and ethics.

Expand. Broaden thinking by providing an alternative perspective or different point of view. For example, use blogs from different countries to examine cultural differences.

Fresh Look. Use blogs to provide current, immediately relevant examples. For example, get the latest science or fashion news.

Inform. Provide primary sources or data that help explain an idea already presented. For example, you can track earthquakes and volcanoes. Consider a statistic or graph that illustrates a point.

Launch. Look for blogs as a place for new, innovative ideas. Be the first to present a new idea rather than simply commenting on the work of others. Ask questions to keep the new idea going.

Synthesize. Bring a number of ideas together. For example, consolidate these comments and draw a new conclusion.

Blog Posting Starters <http://escrapbooking.com/blogging/starter.htm>

Start with a(n)...

Action. Use verbs to bring a posting alive. Start with an event, disaster, or other activity. Then ask a question.

Announcement. Then, suggest a reading.

Challenge. Challenge participants with a bold statement that might cause controversy such as one side of an argument or an opinion.

Choice. Present options or choices then ask a question.

Current Event. Present a news item or important local or global event.

Definition. Provide a word and/or definition. Or, just a word and ask for a definition, illustration or example. Be sure to cite the source. Ask a question that requires a definition.

Emotion or Feeling. Sleepy, dizzy, frantic, or happy... how does it feel?

Experience. Share a personal experience or story about yourself. Connect it to the discussion or topic. If possible, include a photograph.

Figurative Language. A simile (comparison such as or like), metaphor (comparison: this is like that), personification (giving a nonhuman, human qualities), hyperbole (exaggeration).

Opinion. Take a stand and start with an opinion.

Personal experience. Then, suggest a reading.

Quote. The quote could be from a famous person, book, news article, or interview. Be sure to use quotation marks and credit the source.

Question. Focus on questions about a topic (i.e., main idea, connection to other learning), book or movie (i.e., character, plot, setting), or problem.

Riddle or Puzzle. Provide the riddle or puzzle, then provide a reading to help solve the problem.

Scenario. Ask readers to imagine a situation. Consider starting with dialog or conversation.

Statement. Start with some background information that clarifies an issue or focuses attention on a topic.

Statistic. How many or how much? Present a shocking statistic or one that people might question. Consider presenting this information in the form of a chart or graphic.

Surprise. Begin with a shocking or amazing piece of information.

Who, What, When, Where, Why, or How. Start with a "W" or "H" related to a specific character, problem, or event.

Learning Blogs <http://escrapbooking.com/blogging/blog1.htm>

Use blogs to:	Ask meaningful questions	Stimulate new questions
	Promote sharing of process and products	Encourage alternative ideas
	Promote interaction	

The Blogger

Will the teacher host the blog or will students direct activities? Will each student host their own blog or will they share the responsibility? Blogger - Class as a whole, Small groups, Individual students

The Audience

What's the primary and secondary audience of the blog? Is it intended for use inside or outside the classroom? Are the bloggers writing for themselves or a particular audience?

Audience – Themselves, Teacher, Student in class, Students in other classrooms, Parents or local community members, Global audience

The Purpose and Learning Outcomes

What's the purpose of the blog? Why is the blog format being used?

Learning Outcome. What are the specific learning outcomes? What's the objective of the lesson(s)? What standards are being addressed? When used in teaching and learning, the educational outcomes must be clear to the students.

Information. What information will be shared? Where will this information originate? Most blogs are used to share information including facts, data, statistics, links to other resources, opinions, and much more. In addition to text, the blog could contain audio, video, and visuals.

Process or Product. Is the blog mostly about process or product? Blogs are often used by teachers as a tool to document the information inquiry process.

Reflection. Blogs can be used as a metacognitive tool to help people think about their life or learning. These reflections may be intended for themselves, their classmates, or the world.

Interaction. Some blogs focus on communication between the person posting the entry and the people making comments. The responses may include additional information, expanded ideas, or critiques. Sometimes the most important aspect of the blog is questioning.

Assessment. Do the learning outcomes match the assessment? Sometimes blogs are used as a tool for assessment to check student understanding.

The Activities - <http://escrapbooking.com/blogging/blog2.htm>

Analyze. Ask students to analyze a book, article, or other posting.

Brainstorm. Pose problems and create a collection of ideas.

Collaborate. Work collaboratively with another class in the same school or another school.

Communicate. Interact with an expert or conduct an interview.

Compare. Make a comparison.

Discuss. Examine a problem, question, drawing, photograph, or diagram. Then, write captions, analyze elements, speculate, or create.

Explain. Ask students to learn and demonstrate their understanding.

Imagine. Ask student to imagine a situation or scenario.

Observe and Log. Observe human interactions, scientific experiments, or other activities and post a record (i.e., kindness journal, plant growth, survey results).

Persuade. Ask students to make a persuasive argument.

Predict. Read or watch then predict what will happen next.

Problem Solve. Pose a problem and discuss solutions.

Question. Get students involved with asking questions.

React, Think, Act. Connect in-class learning to blog entries. Transfer learning to new situations.

Read and Jigsaw. Read or use online resources and discuss (i.e., quote, website, poem, historical document, problem). Then, analyze, evaluate, and create. Add a comment.

Remember and Reflect. Think about an activity and reflect on it.

Share Teacher and Student Work. Share materials in a digital format including documents, PDF files, photographs, charts, graphics, written work, audio, video, and presentations.

The Approach - <http://escrapbooking.com/blogging/blog3.htm>

Collaboration. Some blogs are used as an environment for cooperation, interaction, and working together toward a joint goal. The students may share the same classroom or work with partners in other places in the world.

Creative Works. Any type of written work can be the focal point for a blog such as poetry, short stories, or television scripts. However, blogs can also be used to share other creative works such as artwork, musical scores, and video productions.

Critique. Ask students to write reviews for websites, books, movies, games, sights, or other topics.

Discussion. Some blogs focus on interaction, reaction, and discussion of a wide range of topics. While forum software is sometimes used for these, blogs can also be effective. Use the blog format for literature-rich discussions related to award books, literature circles, or community book club.

Experiences. Some blogs focus on a particular shared experience such as an annual event, field trip, or school-wide activity. The blog is used to record the experience. It might also involve connecting with students in other locations for a virtual experience.

Experiments. Use a blog to track an experiment or post observations.

Expressions of Passion. Motivation is critical to learning. Sometimes a topical blog can generate passion in students who otherwise find school boring and meaningless.

Inquiry. Use the blog as a tool for questioning, exploration, and investigation. Individually or in groups, students chronicle the inquiry process and use the blog to share their experiences, reflections, and challenges; used to interact and share ideas, provide feedback, and critique ideas.

Journaling. Keep a journal, log, or diary. Work individually or as a class to compose journal entries or assign groups or individual students.

News Reporting. Share local or global current events as a class or individually; post current events articles and invites reactions, thoughts, alternative perspectives, or solutions.

Project Log (plog). Used to chronicle a project.

Portfolio. Some blogs are used for maintaining a portfolio of student work.

Report Writing. Use the blog format to post reports. Students can add web links to web pages, music, or videos. Some blogs also allow photographs. Categories might include key topics or it may be presented chronologically.

Timeline Projects. Trace a timeline; create a parallel timeline. Use Wikipedia Timelines for ideas.

Vocabulary Blog. Post a word and definition. Ask students to create sentences or discuss use of the word in context.

The Guidance - <http://escrapbooking.com/bloggging/blog4.htm>

Build the Blog. Create a title and description that reflects the purpose of the blog.

Guidance. What guidelines and scaffolding will be provided to assure student success? Discussion guidelines, Practice discussions, Sample postings

Model Use. Be sure to provide models of well-written postings. Start with some rich prompts that will promote good discussion. Then, debrief the discussion.

Stay Out Of It. One sure why to stop discussion is by the teacher jumping into the conversation. If you have a concern, email an individual student or post a general class message.

The Assessment - <http://escrapbooking.com/bloggging/blog5.htm>

Judge the quality of student work in a variety of areas: writing, grammar, style, postings, replies, promptness, depth. Involve students in self and peer assessment.

Blog Portfolio. An annotated collection of blog entries demonstrating understanding of course content and intellectual engagement. Examples: American Literature

Evaluating Postings

Use of evidence

Depth of thinking

Substance. Coverage of topics

Engagement with topic

A Dozen Reasons to Blog in Teaching and Learning

Authentic learning experiences

Motivate and engage learners

Promote writing

Peer interaction

Archive student work

Actively involvement by all students

Easy to create and monitor

Differentiate instruction

Instant feedback

Connect with parents

Promote literacy skills

Learn anytime, anywhere

Teaching Blogs <http://escrapbooking.com/bloggging/teaching.htm>

Teachers can use blogging as a tool for teaching, reflection, as well as communicating with students, parents, or other teachers.

Classroom News

Class calendar

Photographs of classroom activities

Periodic review of standards

Homework assignments

Student awards postings

Classroom News and Assignments

Student work

Home

Upcoming events

Teacher Collaboration

Brainstorm teaching strategies

Discuss student or school issues

Coordinate grant writing activities

Work with sick or home bound students

Teacher Reflections

Daily reflections

Teaching activity ideas

Classroom management strategies and "how to's"

Key issues in teaching and learning

Tips for teachers

Funny moments in teaching

Personal development - improving writing and teaching skills through reflection

WebQuests. WebQuest Design Patterns by Bernie Dodge - use these for ideas. In particular, consider the parallel diary, historical story, or simulated diary format.

Blog Features and Services <http://escrapbooking.com/blogging/services.htm>

There are many blog hosting services and resources. Most are for the general public rather than specifically for educators. It's often free for the basic service, but things like graphics and additional services are an additional charge. When selecting blogging software, ask about the following features: HTML Editor, Search Engine, User interaction, File space, Password access, Customization - look 'n feel, Bookmarking and linking; Dedicated Online Hosting Services

Most people start by joining a free or low-cost blog hosting service. The advantage of this approach is that you don't have to deal with any of the technical issues. The disadvantage is that the service may change without notice.

Visuals & Audio for Bloggers

Blog Software

You may prefer to incorporate blog software into your own website. The advantage is that you have more control over your blog environment. The disadvantage is that you need some technical expertise. The following interfaces work well for blogging.

Blog Lingo <http://escrapbooking.com/blogging/lingo.htm>

If you want to be "cool", "hot", or "whatever", then you need to know the lingo.

Barking moonbat - someone on the extreme edge of whatever their -ism happens to be.

Bleg - to use one's blog to beg for assistance like money. Also known as blegging.

Bloiversary - the birthday of the establishment of a blog.

Blogger ecosystem - a chart or list showing the links between blogs.

Blogroach - someone who infests the comments section of a blog with obnoxious postings. Similar to trolls who disrupt discussions by tricking others into reacting.

Blogroll - a collection of links on the sidebar of a blog linking to other blogs.

Blogosphere - the totality of the blogging community. Also known as Blogistan or the blogiverse.

Blogstorm - when a large amount of information, commentary, or activity erupts in the blogosphere.

Blurker - a person who reads many blogs but leaves no evidence of themselves behind; a silent observer.

Crud - when a blogger makes an error in programming that results in visible code appearing on the screen.

Comment Spam - an unsolicited commercial message automatically posted in a blog's comments area.

Dead-tree Media - anything made of paper such as newspapers and magazines.

Dooced (pronounced like deuce) - losing your job for something you wrote in an online blog.

Drive-by Blogging - the sudden rush of blog entries that fill in the gaps and fulfill the requirements of the weblog portfolio assignment.

Edublog - an education oriented blog.

Event blog - a blog set up for a particular event.

Feed Reader - news aggregators that are extensions to web browsers such as Firefox are used to read RSS feeds from blogs and other sources.

Flame - to make a hostile remark; usually of a personal nature.

Klogs - also known as knowledge logs are internal blogs often housed on intranets.

Link rot - when a list of website links contains many dead links

Permalink - a web link that takes you to the permanent location of an article in a blog archive.

Podcasting - using your MP3 player to listen to the audio from a blog.

Plog - a project log used to chronicle a project.

RDF (Resource Description Framework) - a web content syndication format.

RSS (Rich Site Summary) or (Really Simply Syndication) - a web content syndication format; a feed reader is used to check RSS enabled webpages on behalf of a user and display any updated information.

Thread - a side discussion taking place within the comments section of a blog.

Vogging - video blogging

Xenoblogging - the work you do that helps other people's blogs

Create a Blog in Blogger

To practice using a blog, go to <http://ecomunicate.blogspot.com/>
